Product advantages

01

Variable data printing

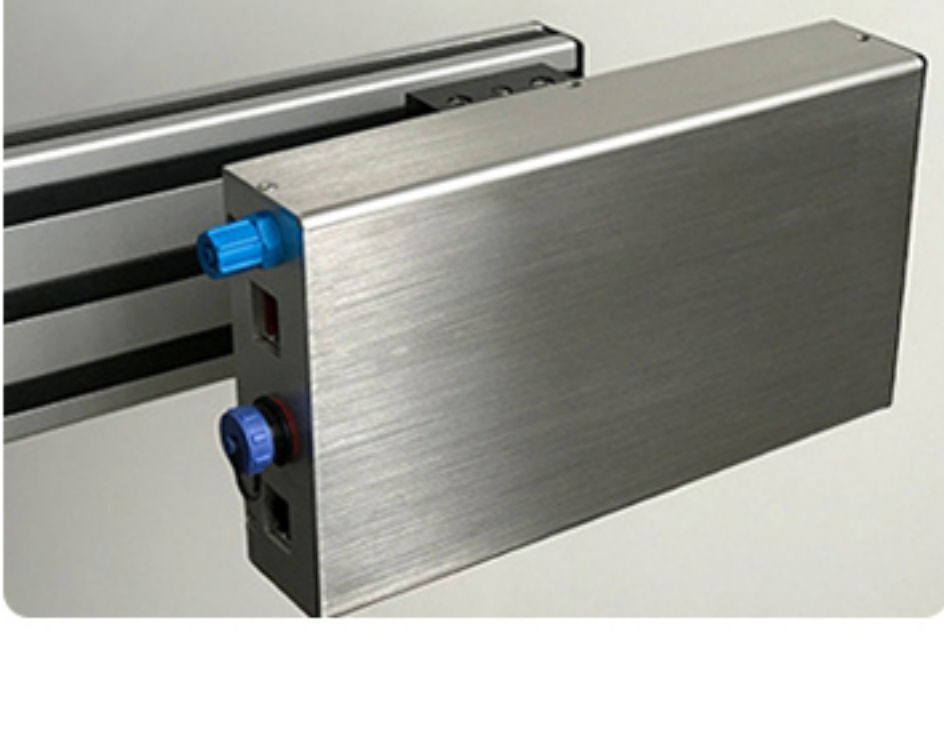

High-resolution UV printing system based on micro piezoelectric technology

02

Continuous ink supply system

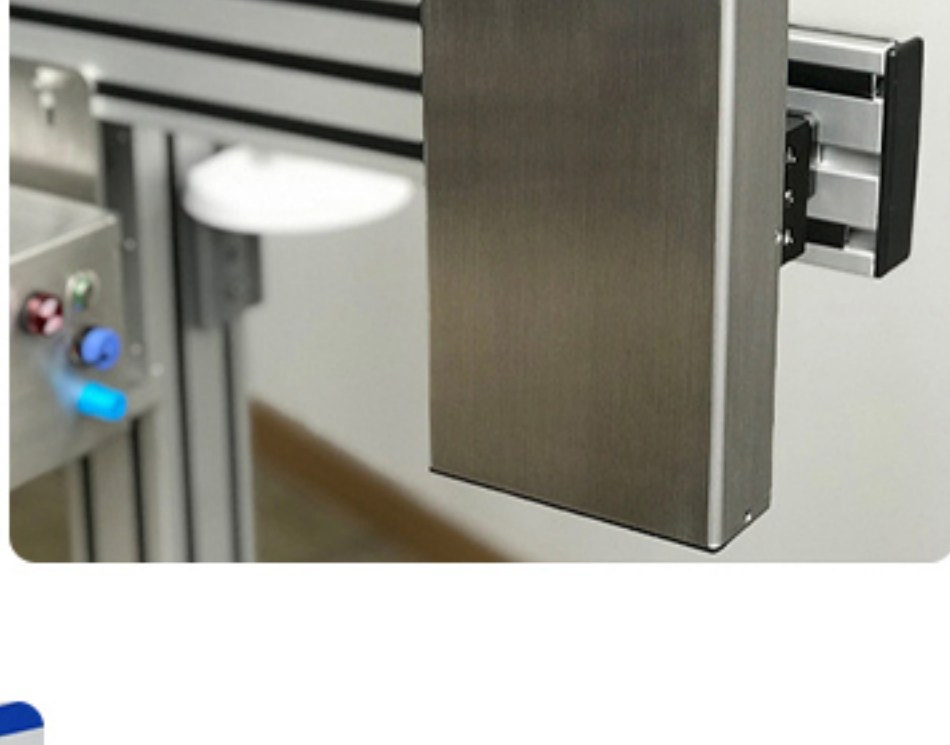

The centralized ink supply system greatly reduces the consumption cost, it is more reliable, easy to operate and easy to maintain

03

Customized nozzles

The machine can print downward, upward, sideward, it can meet multiple simultaneous printing on different printing surfaces

04

Friendly operation interface

Ultra-large capacitive touch screen is based on the Android operating interface, quick operation to edit data, support multi-language/multi-input method

Industry application

Pharmaceutical Industry

Hardware industry

Cosmetics industry

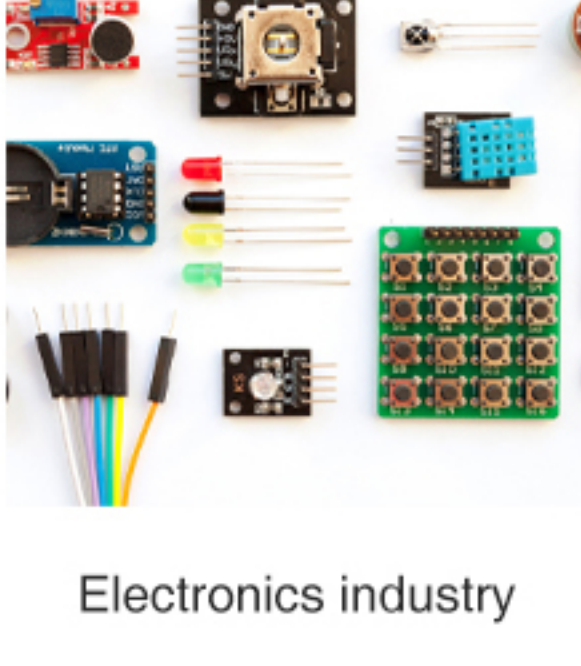

Pipe industry

Wire and Cable

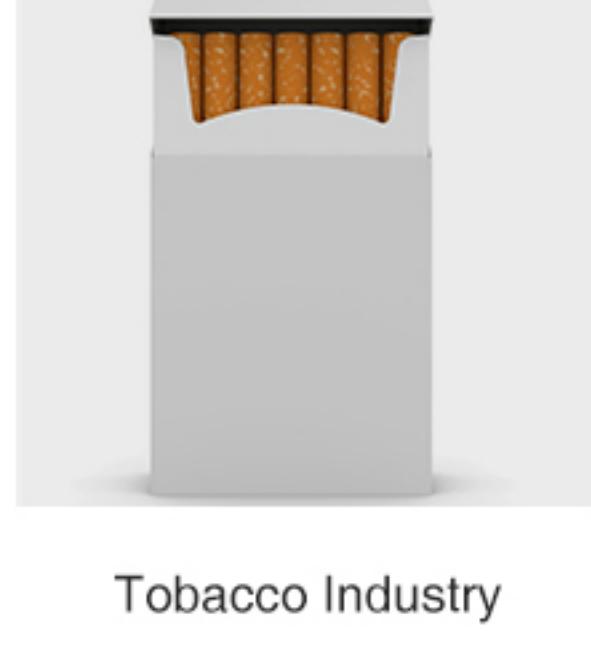

Cosmetics industry

Electronics industry

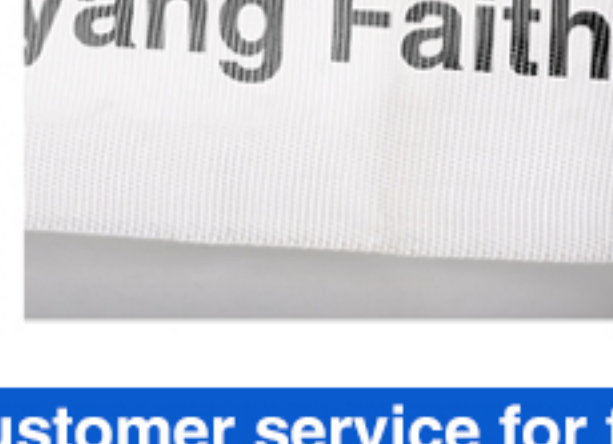

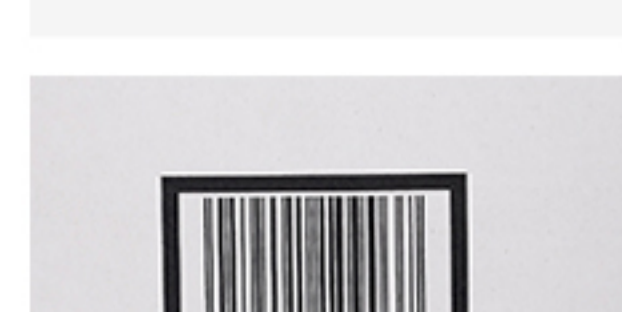

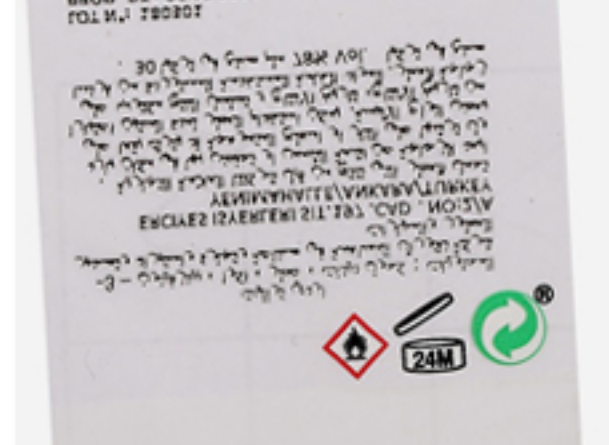

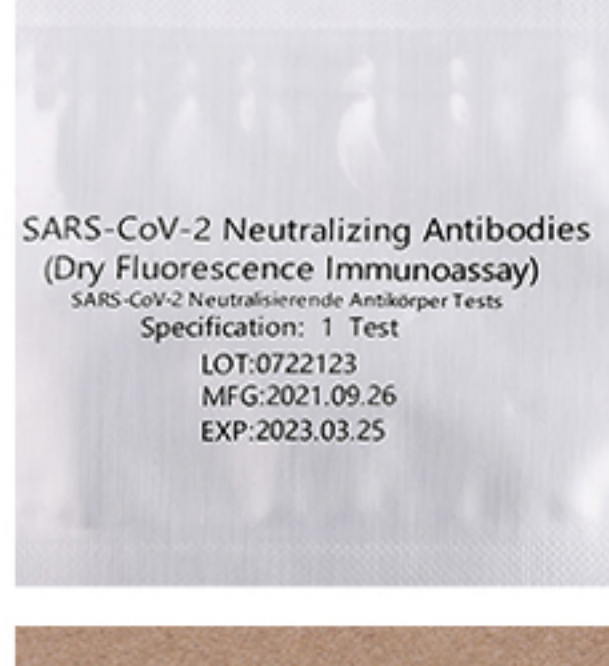

Food and beverage industry

Tobacco Industry

How do customers choose?

- (1) Matching online conveyor
- (2) Matching online paging machine
- (3) Matching automatic packaging production line
- (4) Matching automatic filling production line
- (5) Matching monitoring device production line
- (6) Matching reject device production line
